## Product Description

### Parallel Lathe Machine Big Lathe Manual Lathe Cw6163 Cw6180q Cw61100q Precision Machine

#### Product Introduction:

The heavy-duty horizontal lathe machine is designed using internationally advanced methods and manufacturing technology, adhering to the latest national precision standards. It integrates electrical, automatic control, hydraulic control, and modern mechanical designs from multiple disciplines and categories of precision manufacturing technology.

The CW6150, CW6163, CW6180, CW61100, CW61125, and CW61160 heavy-duty lathes are suitable for turning or machining cast iron and steel workpieces as well as medium to large non-ferrous metal parts. They can perform external cylindrical surface turning, internal hole and end face turning, and various internal and external metric, inch, module, and diametrical pitch threads. The top slide can be used independently for turning of short tapers. These lathes boast high power, high rigidity, and a wide range of rotating speeds, making them ideal for high-speed and strong force turning operations.
